INDUSTRIAL STRENGTH MICR CHECK PRINTING

Check Factory® MICR encoded Check Printing Software for:

Exact Software Macola Progression v7.x

New in Check Factory Visual Series version 5

- Windows 7, Vista, XP (32/64 bit compatible)
- 100% .NET managed code. Uses the Windows GDI+ for all graphics operations.
- Print to ANY Windows printer. No longer limited to specific printers.
- Visual Form Designer. Drag and drop. Modify or create your own forms.
 - All forms are PDF format and are user modifiable.
 - Visual designers are used for all page formatting.
 - **Color printing is fully supported..**
- All standard graphics formats are supported. (JPG, BMP, TIF, PNG)
 - Print to PDF
 - Print to EMAIL
 - Duplexing printers are supported.
- Send each part of a multiple part form to a different printer.
 - New Windows like Security features.

Operation

- Completely AUTOMATIC operation. Correct company, form, checking account will be selected without the need for user intervention.
(Except Quick Books and Pass-Port)

MICR Checks

- One step process prints your checks and MICR encoding at the same time on blank check stock.
- Unlimited number of checking accounts at no extra charge.
 - **New Flexible Signature Security. Total control over signature graphic, signature line and words below line.**
- Automatic check signing. Up to three graphic signatures may be assigned to each checking account. Each may be assigned a dollar limit above which the signature will no longer print.
- Multi-part checks. Each part may be assigned to a laser printer paper source bin.
 - Assign a password to each graphic signature on a check.

Forms

- AP Accounts Payable checks
 - AR Statements
- PR Payroll Checks (limited support)**
 - PO Purchase Orders
 - OE Picking Ticket
 - OE Packing Slip
 - OE Invoice
 - OE Quotation

**Payroll check limitations:

Payroll does not use the report designer in Macola hence we are not able to extract the check number, check amount, company name and form id as we do with modules that use the report designer. This creates some limitations in the Check Factory functions. They are:

Non automatic operation.

Operator must manually select company, form, checking account.
 Must enter starting check number in Check Factory field..
 Cannot print automatic signatures.

- Print Multi-part forms with different titles (Original, Customer Copy etc.). Each part may be drawn from an assigned laser printer paper tray and printed to any printer in the destination printer group.
 For example:
 The Sales Copy will be directed to the printer in the sales office.
 The Packing List will be directed to the printer in the shipping department.
 The Billing Copy will be directed to the billing office -- even if it is in another town!
- Each part of a multiple part form is completely user defined. You can add any number of graphical shapes or images.
- Print W2's on blank paper (except for government required red copy)

- Print forms for unlimited number of companies.

Printing

- **Print forms to ANY Windows printer.** No longer limited to laser printers.
- **Duplexing** printers are supported. Print user defined documents on the back of each page.
- **Color printing is supported.** Color is supported throughout the Check Factory designers.
- **Print to EMAIL** is one step simple. Email an entire print job using embedded email addresses.
- **Print to PDF.** Does not require a separate PDF print driver.
- **Print to multiple printers at the same time.** Printers are defined in groups of one or more Windows printers. EMAIL and PDF included!
 - **Link Forms to specific printer groups.**

Printers

MICR checks require a monochrome laser printer and a "MICR" magnetic toner cartridge for printing checks.
(Available from Trans-Micro)

Security

- **New Windows like Security.** Users are assigned Permission Groups for access to Check Factory features. Users are assigned Account Groups for access restrictions to checking accounts. Security may be disabled for small home office use.
- Users can be locked out of almost any feature in Check Factory. Eliminate user created errors. Prevent unauthorized modifications.

Audit Trail

- Creates an optional audit report for any or all checking accounts. Reports activity each time a checking account is accessed. Reports date, check number, payee amount, time, account, user name etc.

GRAPHICS

- Using **Visual Designers**, import any bitmap graphic format for logos and signatures.

Customization

- **New Easy to Use Visual Form Designer.** Create and Modify any form.
- Check Factory Visual Series is based on **PDF technology.**
