## for Effective Workforce Management

### Know what your people are doing and how much they are costing you with iLynq Labour

Labour is one of your biggest manufacturing costs. Effective management is vital. Yet more than half of manufacturing companies use inadequate paper records for labour. Some don't keep records at all. Furthermore, companies with time recording systems don't always combine these with their manufacturing systems. This is a missed opportunity. iLynq Labour resolves these issues and puts you in control.

#### The importance of managing labour

No one in manufacturing doubts how important it is to manage labour. Without effective labour control, you lose money, waste time and inflate your manufacturing costs.

To grow your business, you have to make the best use of labour. You can't afford to have people waiting to start a job or working unnecessary overtime. You also need to control non-productive labour costs. You have to know when people take breaks and for how long. And discipline is another factor. You must have reliable data before you can take disciplinary action.

Up-to-date information about labour is crucial. Surprisingly, most manufacturers don't have systems in place to provide it.

#### Providing the data you need

With iLynq Labour, you can manage labour effectively. iLynq Labour gives you the data to cut costs, improve your productivity and streamline admin.

You can trust iLynq Labour implicitly. The members of the iLynq Labour development team have manufacturing and supply chain backgrounds. They know what data you require to make effective decisions.

#### Full integration

Time and attendance recording systems are usually separate from Macola. This means working out the true cost of labour in the manufacturing process is a struggle.

cont over...

iLynq Labour delivers:

- 1.** Improved productivity. Manage labour more effectively by knowing who is doing what. Get the best from your investment in labour.
- 2.** The latest production information. Identify labour problems and make necessary changes.
- 3.** Accurate cost data. Establish where labour is making you money and where it's not.
- 4.** Reduced labour costs. Identify and correct areas of wastage, and reduce labour costs.
- 5.** Greater control of overtime. Manage overtime more efficiently.
- 6.** Fast ROI. Save money and achieve a rapid ROI.

iLynq Labour fully integrates with Macola ES or Progression. Use iLynq Labour alongside Visual Planner to manage your production and workforce cohesively.

You can also use iLynq Labour to extend the data you receive from the Mitrefinch time and attendance recording system.

### **An essential management tool**

iLynq Labour enables you to analyse and manage work time and associated costs. With iLynq Labour, you:

#### **Improve productivity**

You can combine the latest labour data on iLynq Labour with the Macola costing and production planning process to improve productivity.

#### **Cut wastage**

By linking with Macola, iLynq Labour cuts wastage. This follows the principle of lean manufacturing. Working with Visual Planner software, you no longer have time wasted because your employees don't have the parts to do their jobs, or the machines aren't ready for them.

#### **Assess the need for overtime**

iLynq Labour highlights overtime costs. It gives you the tools to decide if working overtime is the best approach.

#### **Identify non-productive costs**

Obtain details of lost, non-productive time from iLynq Labour. This data includes late arrivals for work, early leaving and breaks. Use it to control your costs and handle disciplinary issues.

#### **Resolve problems quickly**

Compiling and analysing manual data is slow, tedious and often inaccurate.

Rapid, precise information from iLynq Labour enables you to act promptly to avoid problems.

#### **Save money**

iLynq Labour delivers a fast ROI and reduces your payroll costs.

#### **Your options**

– iLynq Labour is easy to install and use. It's also

flexible. Employ it on one site or many.

- With iLynq Labour, your staff can clock on and off from any authorised device. These include tablets, iPhones and PCs.
- Choose the most suitable version of iLynq Labour for your business. Integrate with Macola and transfer data to Mitrefinch, or use a standalone version of iLynq Labour with Macola integration.
- Integrate iLynq Labour with Lynq's Visual Planner. With Visual Planner, you create production plans. iLynq Labour helps you resource these plans quickly and accurately.
