tools

**Imports \$995**

Import new or change existing Macola data quickly using Excel (CSV). Items, Price Codes, G/L Accounts, Customers, Alternate Address, Vendors, Item Location Prices and more.

**OrderIntegrator \$4,995**

Orders generated in one system (other company, external spread sheets, partners), flow into Order Entry without using a human. Eliminate tedious, time consuming and error prone data entry.

**OrderIntegrator Excel, XML or cXML add-on \$995/each**

Extend the functionality of OrderImport to include Excel, XML or cXML files.

**JobMaster \$995**

Real-time, business process automation and job scheduling. Macola integrated to increase and ensure the quality of job processes in a reliable convenient way. Automates the import process either by times or continuous file checks or scans.

**View Macola Record Locks \$499**

Real Time display of all Macola Record Locks.

**BankingTools \$995**

This suite offers BankRec to automate the reconciliation process. BankRec uses files provided by your bank to automatically reconcile your checks and provides a report of discrepancies. PositivePay provides data files for your bank to verify checks you have written. EFTFormatter works with Peak Data's EFT program to provide custom EFT formats for international banks. Macola Progression only.

**DataScubbing \$995**

Verify information & correct your entire database in minutes. Easy to use, interactive tool allows user to update Ship Vias, Customer types and verify Countries. Data Scrubbing is excellent for OLAP users where a consistent database is critical.

**KeyFixer \$1995**

Automatically replace any key everywhere in Macola. Set original and replacement key, then sit back and watch it run. Imagine, change item number, item table, BOM table, open order, and Order History Table – everywhere a specific code exists in Macola with one update.

**GLMation \$995**

Automate GL transaction entry. Your clients can develop complex spreadsheet calculations for GL entries and never enter them by hand again. Simply export the calculation results and GL Mation will create the batch of transactions to post.

**Auto Cash Receipts \$1995**

Automate the process of creating time consuming and error prone Cash Receipts entries. Automatically create the entire Deposit from an Excel file.
