

Improve your user experience and positively impact your ERP investment

Exact Macola 10 changes the way you interact and transact with ERP data. Configurable Workspaces streamline business processes, improve usability and increase productivity.

One of the key, and certainly most visible, elements of Exact Macola 10 is the addition of Configurable Workspaces.

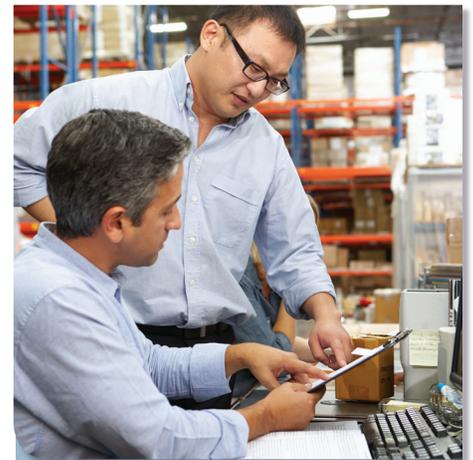

These workspaces use multiple visual elements to turn data into consumable information that can be used to make informed business decisions. In fact – turning data into usable information is the primary goal of Configurable Workspaces.

Configurable Workspaces allow you to tailor your ERP interface to fit your specific needs, replacing the need for expensive, time-consuming service engagements previously required to customize your solution.

Right out of the box, with Exact Macola 10, you can take advantage of preconfigured workspaces for several different professional roles -- or within a few minutes, configure the workspace to meet your individual needs.

These modern, intuitive interfaces aim to provide the same user experience across client/server, browser based, and mobile platforms. Furthermore, workspaces use smart, contextual menus – offering users options and data that are contextually significant – in other words, it shows the right menus at the right times and enables you to dive deeper or take action – directly from the workspace.

It has long been said that a picture is worth a thousand words – and that is the real power of the workspace. The visual representation of your data gives you the power to interpret multiple points of information, quickly, all from a single screen. With fully configurable workspaces, you'll always have the right information at the right time – giving you the information and confidence to make solid business decisions.

Exact Macola 10 includes pre-configured workspaces – to be used “as-is” – or as a starting point for your own custom creations. There are numerous pre-configured workspaces for various groups, such as:

- Executive
- Finance
- Inventory
- Manufacturing
- Purchasing
- Sales

And it all comes together.

Customer Service Workspace

Exact Macola 10 workspaces are fully configurable to address your unique business processes and requirements.

- Context-driven menus, functions, dashboards and reports are configurable and modular, simplifying day-to-day tasks and processes for each job function.
- Workspaces can be built from the ground up, or modified from a template. Use templates to configure role, report and field-based menus to take relevant actions on information that is important to you.

To learn more about how Exact Macola 10 can help your business grow, contact us at 1.800.468.0834 or visit us online at www.ExactMacola.com

Role-based workspaces are modeled after standard business processes and designed around best practice execution. Role-based workspaces provide users with an intuitive experience, including relevant function and visibility to enable role-specific access to critical information.

Whether you work in operations, finance, marketing or on the manufacturing floor, Exact Macola 10 provides an improved, optimized navigation experience for each business process, saving you key strokes and time. Usability is enhanced greatly by integrating ERP transactions with your natural processes.
